MAIL TO  Mr. James Drake Signal & Train Control Specialist Federal Railmad Administration 901 Locust Street - Suite 464 Kansas City, MO 64106  james.drake@fra.dot.gny			REPORTING CARRIER (railroad & region or division) Burlington Northern Santa Fe Railway				
			Southwest Div				
			REPORTING OFFICER (signature/title) Supervisor Signals				
4; the failure should be classified under the basic system or appliance of which it forms an essential part. E.g.: assume grounds cause a block signal to indicate a false proceed causing corresponding indications of a cab signal system on each train approaching this point, such failure should be included in Item 1. Block System			A -Automatic			EM	-Electromechanical
						EP	-Electropneumatic
			ACS -Automatic cab signal		FP	-Faisc proceed	
					MP	-Manual block	
A false proceed failure is a failure of a system device or appliance to indicate or function as intended which results in less restriction than intended.			APB -Absolute permissive block		M	-Mechanical	
			ATC -Automatic train control				
			ATS	-Automatic train st	оp	P	-Pncumatic
				-Color light		PL	-Position light
			CPL-	Color position ligh	t .	SA	-Semiautomatic
			E	-Electric		TC	-Traffic Control
